Driver and Authorized Roles View

The same company workspace, with access matched to each person's work.

01 Driver

Assigned jobs, shared Wallet documents, delivery paperwork and communication.

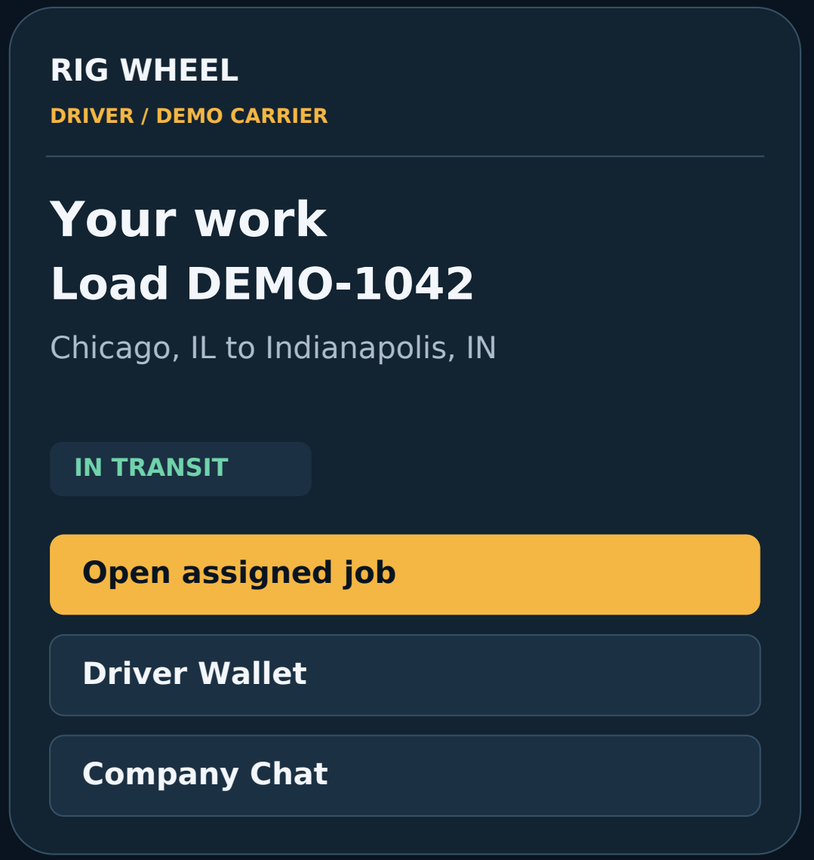

02 Dispatch

Company jobs and fleet assignments when the admin grants those permissions.

03 Billing

Invoice preparation and payment history with invoice permission.

ILLUSTRATIVE VIEW / FICTIONAL DATA

Driver: assigned job and delivery paperwork

The driver works inside the assigned load and its job conversation.

01 Load details

Review the assigned trip and send an ETA update in the job conversation.

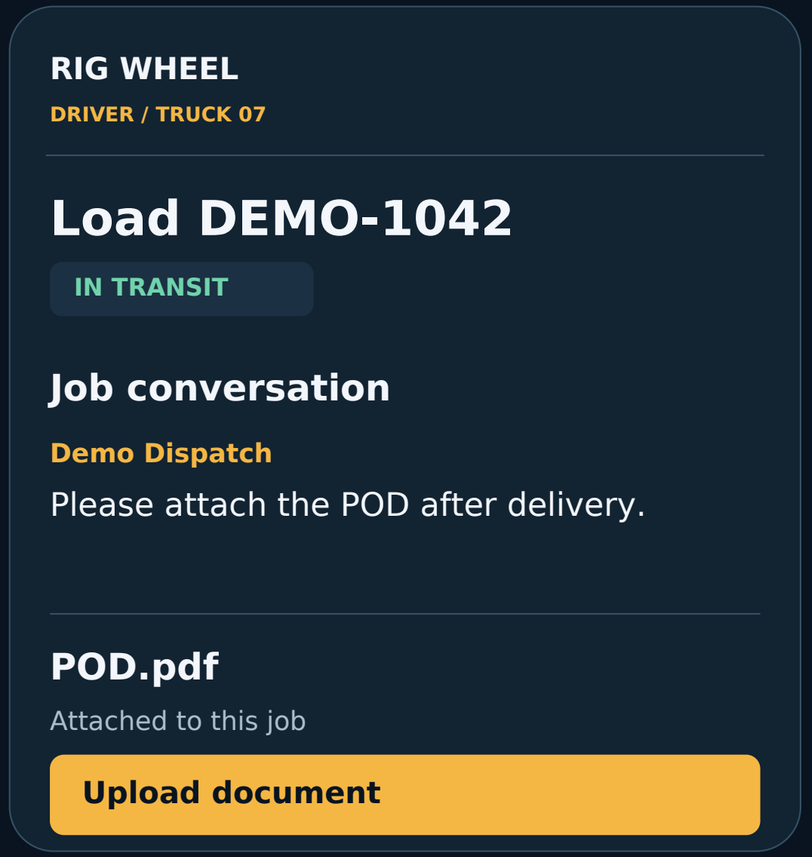

02 BOL and POD

Attach delivery paperwork to the job so authorized office users can use it for billing.

03 Document boundaries

Rate confirmations need a separate admin grant. Standard driver access does not grant company invoice access.

ILLUSTRATIVE VIEW / FICTIONAL DATA

Driver: Wallet and fuel receipts

Documents and fuel records stay close to the work in the cab.

01 Shared documents

Open the cab card, insurance or permits that the company shares with the driver.

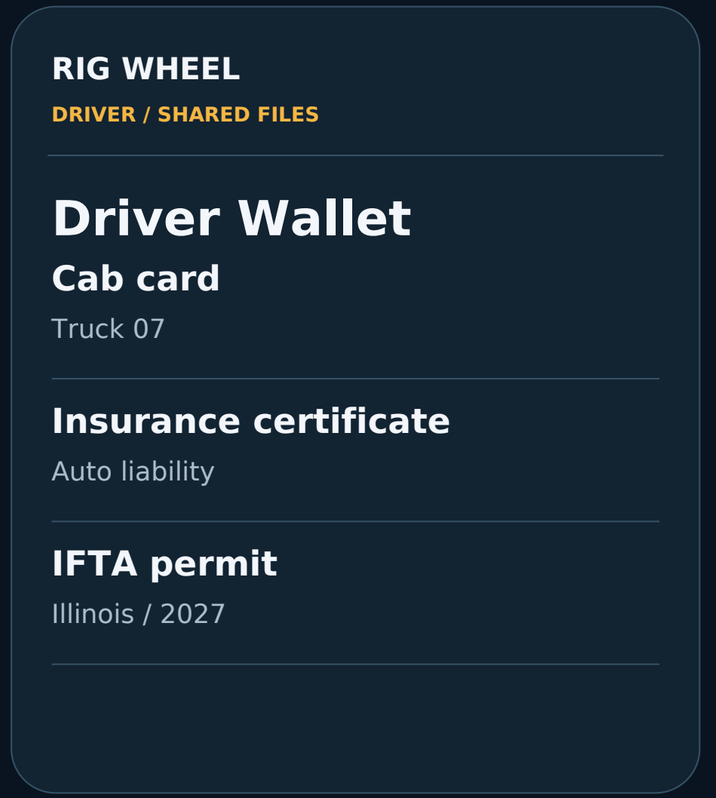

02 Fuel journal

Upload or scan a receipt, review the extracted details, then save the entry.

03 Offline access

Previously synced Wallet files may be available offline. Device storage and successful sync determine availability.

ILLUSTRATIVE VIEW / FICTIONAL DATA

Authorized user: Dispatch

A dispatch preset combines invoice and job access with fleet management.

01 Company jobs

Create and manage jobs, assign the trip and follow the job conversation.

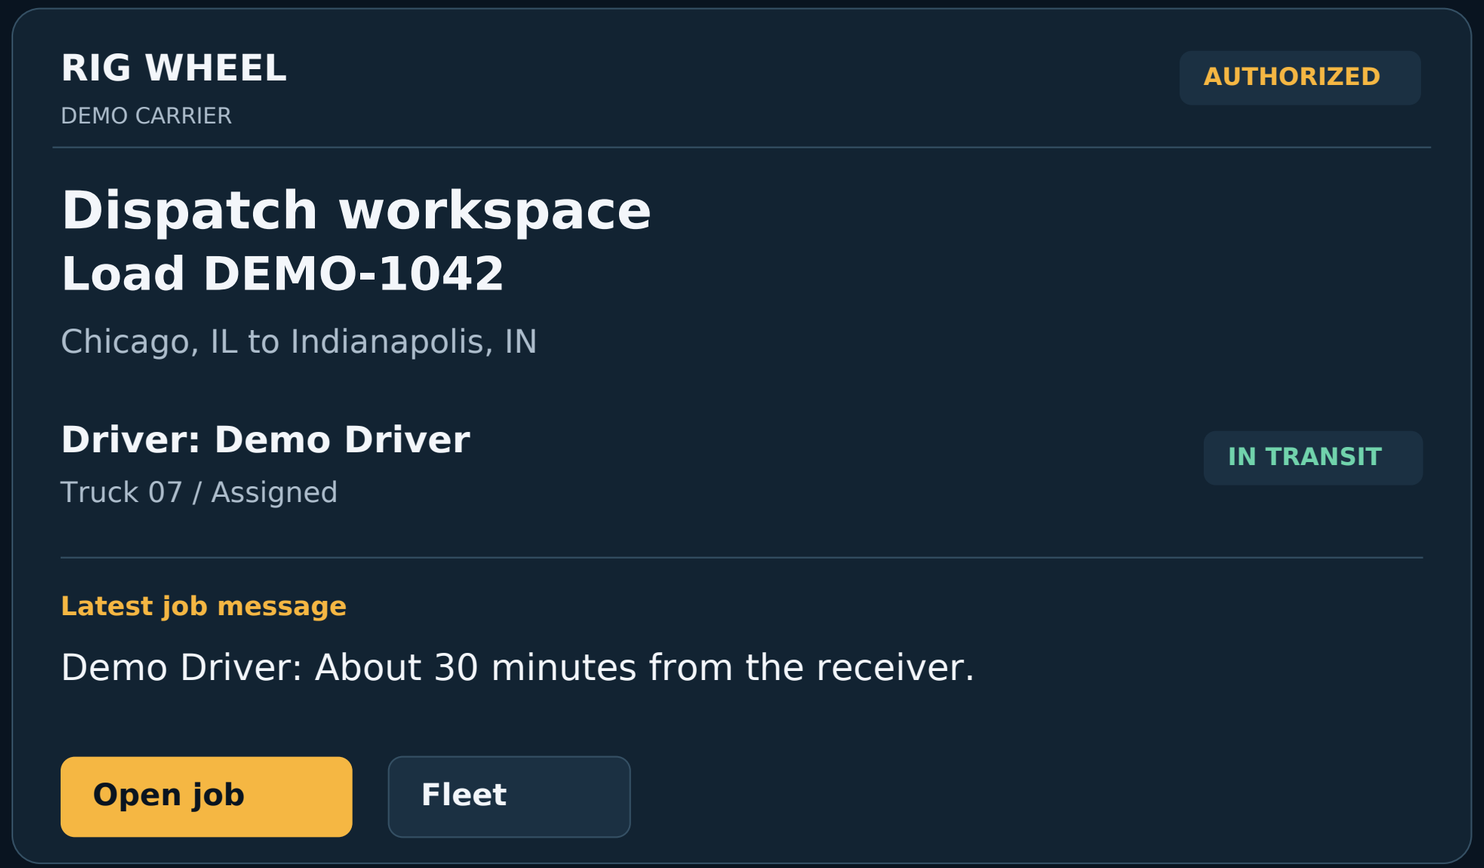

02 Fleet assignments

Manage driver and truck assignments, then review reported problems.

03 Additional grants

Gmail import, Wallet management and subscription billing each need their own permission.

ILLUSTRATIVE VIEW / FICTIONAL DATA

Authorized user: Billing

The billing preset grants invoice work and access to all company jobs.

01 Invoice preparation

Review load fields and charges, then use the job's BOL and POD in the invoice workflow.

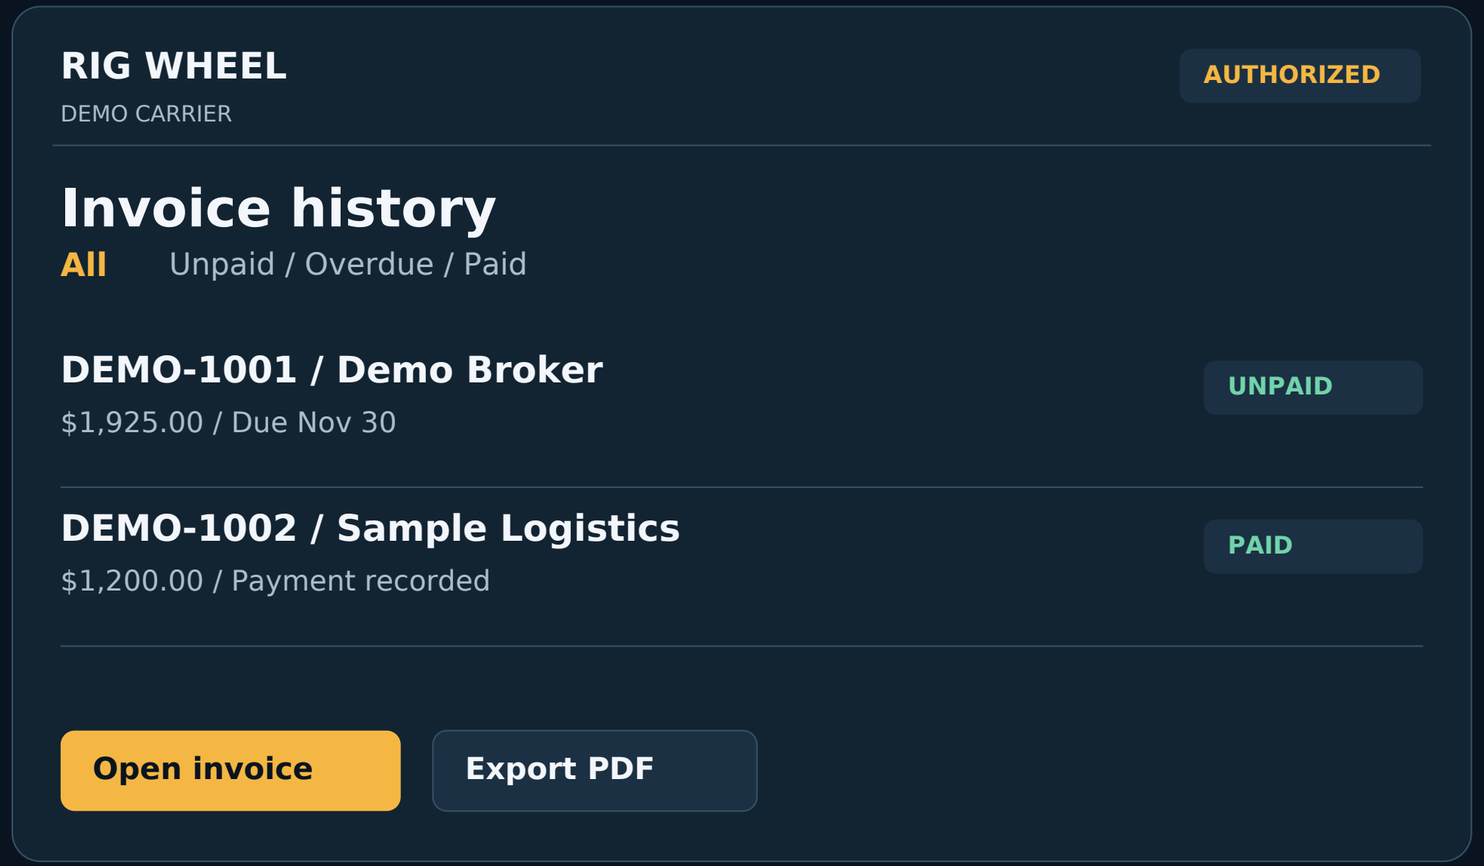

02 Exports and payment status

Export the PDF package, print or send it, and review invoice history.

03 Subscription is separate

A Billing category does not automatically grant subscription billing, fleet management or Gmail import.

ILLUSTRATIVE VIEW / FICTIONAL DATA

Permission boundaries and device access

The administrator can tailor each person's access as their responsibilities change.

Example permission setup	Owner/Admin	Driver	Dispatch	Billing
Invite users / change access	Yes	No	No	No
Company invoices and all jobs	Yes	Off	On	On
Fleet management	Yes	Assigned truck*	On	Off
Wallet management	Yes	Shared files*	Off	Off
Administrator's Gmail import	Connected	Off	Separate grant	Separate grant
Subscription billing	Yes	Off	Off	Off

*Driver access covers assigned work and shared documents, without management rights. Presets shown; the admin can change permissions.

Invoice permission also grants all company jobs. Gmail import additionally requires invoice access and the connected admin mailbox.

Android and desktop

Use Rig Wheel with the same company account. Available controls follow your saved permissions.

iPhone and iPad

Use Safari or Add to Home Screen. Background location and uploads may pause. Native iOS remains a future option based on demand.
